PERSONAL PROJECTS

WeatherNow (10/2024 - 01/2025)

- Developed a real-time weather application using React that fetches and displays weather data for any location. The app provides users with essential weather details such as temperature, humidity, wind speed, and weather conditions using a user-friendly interface.
- Integrated a weather API to fetch real-time weather updates based on user input.
- Gained hands-on experience in API integration, state management, and UI/UX design in React.

SocketChat (04/2024 - 08/2024)

- Developed a real-time chat application that enables users to send and receive messages instantly. The application utilizes Node.js and Socket.IO for real-time communication, allowing for instant messaging with one-to-one and group chat capabilities.
- Integrated Socket.io to enable instant communication between users.

PortfolioX (06/2023 - 08/2023)

- Designed and developed a responsive personal portfolio website using HTML, CSS, JavaScript, and Bootstrap to showcase my skills, projects, and resume in a professional manner. The website features a dark mode toggle for improved user experience.
- Added smooth scrolling and dynamic content updates using JavaScript. Included a downloadable resume and a contact form with email functionality.
